

Higher trophic level

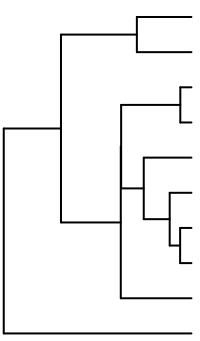

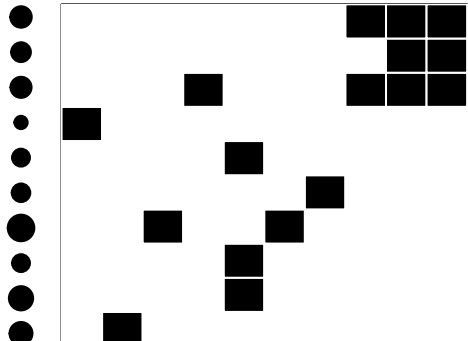

Late diversification, weak
phylogenetic signal ($\rho = 1e-04$)

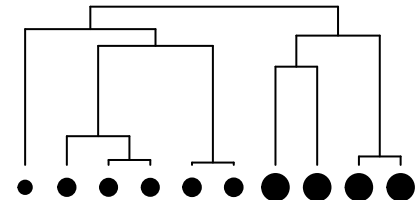

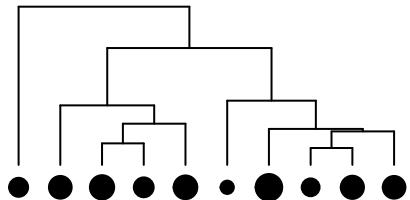

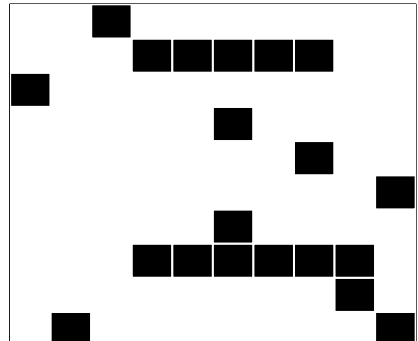

Early diversification, strong
phylogenetic signal ($\rho = 5$)

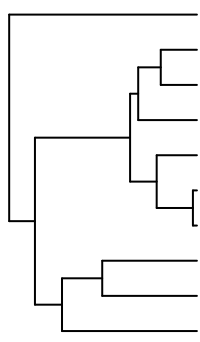

$\rho = 1e-04$

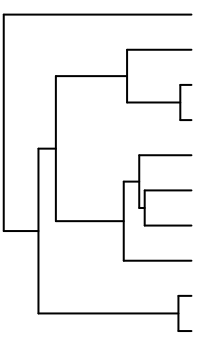

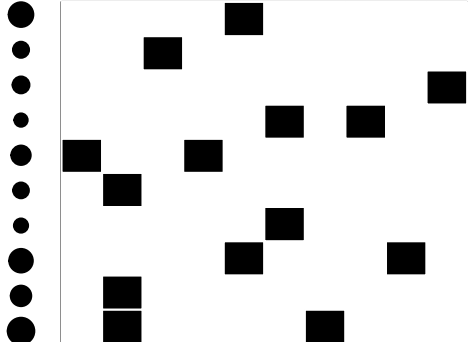

$\rho = 1e-04$

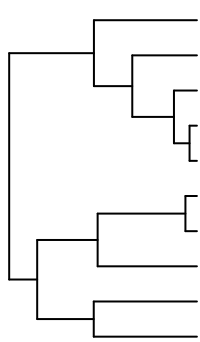

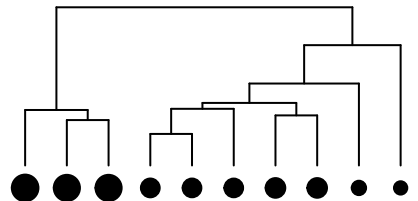

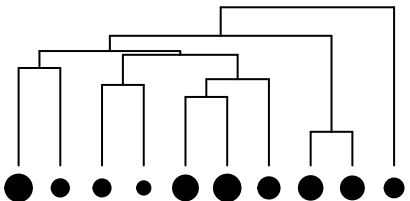

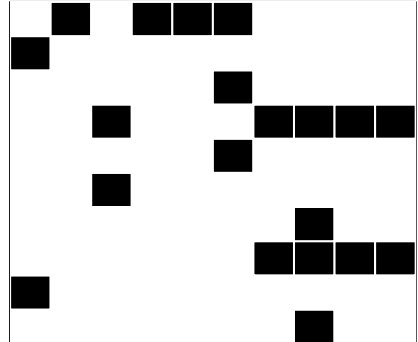

Lower trophic level

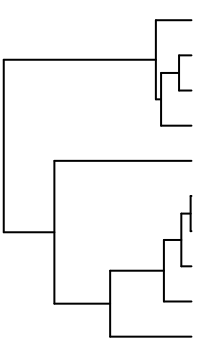

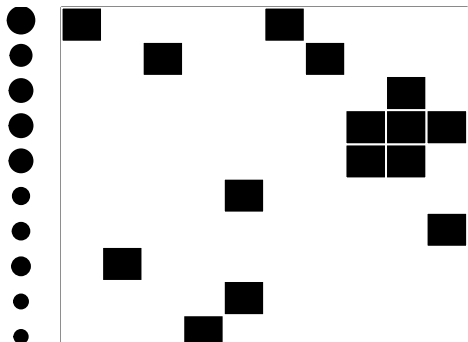

$\rho = 1$ (Brownian motion)

$\rho = 1$ (Brownian motion)

$\rho = 5$

$\rho = 5$
